

–CONTENTS–

Foreword

CHAPTER 1 OUTLINE

1. Objectives	1
2. Implementation structure	1
3. Outline	1
4. Reading the survey results	5
5. Presentation of information	9

CHAPTER 2 SURVEY RESULTS (GENERAL FINDINGS)

1. Topics with a high degree of importance	13
1.1 Overall trends	13
1.2 Trends in forecasted realization time	22
1.3 Relationship with expected effect.....	22
2. Major technological trends in expected effect.....	23
2.1 Trends in each fields.....	23
2.2 Trends in forecasted realization time.....	24
2.3. Relationship with current leading countries etc.....	32
2.4 Relationship with measures the government should adopt.....	33
2.5. Relationship with potential problems	34
3. Trends in forecasted realization time.....	36
3.1 Overall trends	36
3.2 Comparison of first and second round questionnaires.....	38
3.3 Forecasted realization times by respondents with a high degree of expertise	39
3.4 Topics with a high “will not be realized” response rate	40
3.5 Chronological table of technology forecast	41
4. Leading countries etc.....	45
4.1 Trends in each field	45
4.2 Topics with a high “USA” response rate	46
4.3 Topics with a high “EU” response rate.....	47
4.4 Topics with a high “Former Soviet Union and Eastern Europe” response rate.....	48
4.5 Topics with a high “Japan” response rate.....	49
4.6 Topics with a high “Other countries” response rate	50

5. Effective measures the government should adopt in Japan.....	51
5.1 Overall trends	51
5.2 Foster researchers, engineers and research assistants (Foster human resources)	53
5.3 Enhance systems to promote personnel exchanges among the industrial, academic and government sectors and cooperation among different fields of science and technology (Promote exchanges among industrial, academic and government sectors and different fields).....	54
5.4 Upgrade advanced R&D facilities and equipment and make them available for more widespread use (Upgrade advanced facilities and equipment).....	56
5.5 Develop a research base comprising data bases, standard reference material, genetic resources and the like (Develop a research base)	57
5.6 Increase the government’s funding for research (Increase government research funding)	58
5.7 Adjust relevant regulations (relax/toughen/establish/abolish).....	59
6. Potential problems in Japan	60
6.1 Overall trends.....	60
6.2 Adverse effect on the natural environment.....	61
6.3 Adverse effect on safety (disaster prevention, health, security, privacy etc.).....	62
6.4 Adverse effect on morals, culture or society	63
7. Intersecting technological fields.....	64
7.1 Setting the intersecting axes	64
7.2 Aging countermeasures	65
7.3 Safety	72
7.4 Environmental preservation etc.	79
7.5 Common base technologies	89
8. Identical and similar topics among fields	98
8.1 Examples of topics with similar results	98
8.2 Examples of topics with a recognized difference in forecasted realization time.....	101
8.3 Examples of topics with a recognized difference in degree of importance	102
9. Comparison with forecasted realization time and degree of importance results in the 5th survey	103
9.1 Trends by field.....	103
9.2 Topics with earlier/later forecasted realization times	104
9.3 Topics with a significant change in degree of importance	106
10. Assessment and analysis of the results of the 1st and 2nd surveys.....	108
10.1 Purpose	108
10.2 Assessment method.....	108
10.3 Analysis of realization rate	110
10.4 Relationship between degree of imprecate and realization rate.....	112
10.5 Forecasted realization time and realization rate.....	113
10.6 Unrealized topics	114
10.7 Topics realized early.....	116

CHAPTER 3 SURVEY RESULTS (FINDINGS BY FIELD)

1. Survey results in “Materials and processing”	117
1.1. Trends in noteworthy domains	117
1.1.1. Precision synthesis and structural control through the manipulation of atoms and molecules	117
1.1.2. Incorporation of high-level computer science into materials and processing design.....	118
1.1.3. Elucidation of biofunctions and their incorporation into the development of highly functional materials and processes.....	118
1.1.4. Development of materials and processes connected with global problems	119
1.2. Forecast topic framework	120
1.3. Topics with high degree of importance	120
1.4. Forecasted realization times.....	122
1.5. Current leading countries etc.	123
1.6. Comparison with the 5th Survey (previous survey).....	123
1.7. Table of survey results.....	128
2. Survey results in “Electronics”	138
2.1. Trends in noteworthy domains	138
2.1.1. Microelectronics	138
2.1.2. Optoelectronics.....	141
2.1.3. Molecular, bio, sensor electronics	141
2.1.4. Storage and display electronics.....	143
2.2. Forecast topic framework	144
2.3. Topics with high degree of importance	145
2.4. Forecasted realization times.....	146
2.5. Current leading countries etc.	147
2.6. Comparison with the 5th Survey (previous survey).....	147
2.7. Table of survey results.....	149
3. Survey results in “Information”	157
3.1. Trends in noteworthy domains	157
3.1.1. Computers and related equipment	157
3.1.2 Networks.....	158
3.1.3. Software and algorithm.....	158
3.1.4. Lifestyle, medical care, welfare and disaster prevention	159
3.1.5. Society, work, and the local community.....	160
3.1.6. Education and entertainment	161
3.2. Forecast topic framework	162
3.3. Topics with high degree of importance	162
3.4. Forecasted realization times.....	164
3.5. Current leading countries etc.	164
3.6. Comparison with the 5th Survey (previous survey).....	164
3.7. Table of survey results.....	166
4. Survey results in “Life science”	174
4.1. Trends in noteworthy domains	174
4.1.1. Progress in cancer research.....	174
4.1.2. High-speed genome analysis technology and application of genome information.....	175
4.1.3. Molecular mechanisms of development, differentiation and morphogenesis.....	177

4.1.4. Brain functions	178
4.1.5. Elucidation of plant functions and its use	179
4.1.6. Structural biology	180
4.1.7. Substance and energy conversion	181
4.1.8. Immune system.....	183
4.1.9. Medical engineering	186
4.1.10. Sensors and computers.....	188
4.2. Forecast topic framework	190
4.3. Topics with high degree of importance.....	190
4.4. Forecasted realization times.....	192
4.5. Current leading countries etc.	192
4.6. Comparison with the 5th Survey (previous survey).....	193
4.7. Table of survey results	196
5. Survey results in “Space”	206
5.1. Trends in noteworthy domains.....	206
5.1.1. Earth observation/global environment.....	206
5.1.2. International space science activities	207
5.1.3. Space transportation.....	208
5.1.4. Communication and control.....	209
5.1.5. New outlook of space environment utilization	210
5.2. Forecast topic framework	212
5.3. Topics with high degree of importance.....	212
5.4. Forecasted realization times.....	214
5.5. Current leading countries etc.	214
5.6. Comparison with the 5th Survey (previous survey).....	215
5.7. Table of survey results	216
6. Survey results in “Marine science and earth science”	222
6.1. Trends in noteworthy domains.....	222
6.1.1. Degree of importance to Japan	223
6.1.2. Expected effect	223
6.1.3. Forecasted realization times.....	224
6.1.4. Leading countries.....	224
6.1.5. Effective measures government should adopt in Japan	224
6.1.6. Potential problems in Japan	224
6.2. Forecast topic framework	225
6.3. Topics with high degree of importance.....	225
6.4. Forecasted realization times.....	227
6.5. Current leading countries etc.	227
6.6. Comparison with the 5th Survey (previous survey).....	228
6.7. Table of survey results	231
7. Survey results in “Resources and energy”	
7.1. Survey Results in “Resources”	239
7.1.1. Trends in noteworthy domains.....	239
7.1.2. Forecast topic framework	242
7.1.3. Topics with high degree of importance.....	242
7.1.4. Forecasted realization times.....	244
7.1.5. Current leading countries etc.	244
7.1.6. Comparison with the 5th Survey (previous survey).....	245
7.1.7. Table of survey results.....	247

7.2. Survey Results in “Energy”	251
7.2.1. Trends in noteworthy domains	251
7.2.2. Forecast topic framework	252
7.2.3. Topics with high degree of importance	253
7.2.4. Forecasted realization times.....	255
7.2.5. Current leading countries etc.	255
7.2.6. Comparison with the 5th Survey (previous survey).....	255
7.2.7. Table of survey results.....	258
8. Survey results in “Environment “	263
8.1. Trends in areas of attention.....	263
8.1.1. Introduction of design technologies for the realization of a recycling society (LCA).....	263
8.1.2. Establishment of environmental management techniques	264
8.2. Forecast topic framework	264
8.3. Topics with high degree of importance	265
8.4. Forecasted realization times.....	267
8.5. Current leading countries etc.	267
8.6. Comparison with the 5th Survey (previous survey).....	268
8.7. Table of survey results	270
9. Survey results in “Agriculture, forestry and fisheries”	274
9.1. Trends in areas of attention.....	274
9.1.1. Sustainable production activities harmonious with environment	274
9.1.2. Stable supply of healthy and safe food and protection of living environment.....	275
9.1.3. Utilization of biological functions and new industrial uses	276
9.1.4. Agriculture Biotechnology/crop production	277
9.1.5. Livestock farming and grasslands.....	278
9.1.6. Forests and forestry industry.....	279
9.1.7. Fisheries industry.....	280
9.2. Forecast topic framework	281
9.3. Topics with high degree of importance	281
9.4. Forecasted realization times.....	283
9.5. Current leading countries etc.	283
9.6. Comparison with the 5th Survey (previous survey).....	283
9.7. Table of survey results	286
10. Survey results in “Production and Machinery”	295
10.1. Trends in areas of attention.....	295
10.1.1. Introduction	295
10.1.2. Prediction about relationship between tools, information, energy, environment, living organisms and human beings	296
10.2. Forecast topic framework	298
10.3. Topics with high degree of importance	298
10.4. Forecasted realization times.....	300
10.5. Current leading countries etc.	300
10.6. Comparison with the 5th Survey (previous survey).....	301
10.7. Table of survey results.....	303
11. Survey results in “Urbanization and Construction”	311
11.1. Trends in areas of attention.....	311
11.1.1. Urbanization and construction technologies at momentous turning point.....	311
11.1.2. Development of safe and secure urban spaces.....	312
11.1.3. Establishment of environmental conservation and nature rehabilitation technologies	312
11.1.4. Response to mature society.....	314
11.1.5. Productivity improvement, cost reduction and quality maintenance	315

11.2. Forecast topic framework	316
11.3. Topics with high degree of importance.....	317
11.4. Forecasted realization times.....	318
11.5. Current leading countries etc.	319
11.6. Comparison with the 5th Survey (previous survey).....	319
11.7. Table of survey results.....	322
12. Survey results in “Communications”	330
12.1. Trends in areas of attention.....	330
12.1.1. Digital broadcasting.....	330
12.1.2. Move towards ultrafast intelligent networks.....	331
12.1.3. Mobile communication	332
12.1.4. Advances in multimedia communication.....	333
12.2. Forecast topic framework	334
12.3. Topics with high degree of importance.....	335
12.4. Forecasted realization times.....	337
12.5. Current leading countries etc.	337
12.6. Comparison with the 5th Survey (previous survey).....	338
12.7. Table of survey results.....	340
13. Survey results in “Transportation”	348
13.1. Trends in areas of attention.....	348
13.1.1. Trends towards computerized and intelligent transportation systems.....	348
13.1.2. Sophistication of transportation functions (high speed, convenience and more sophisticated services)	349
13.1.3. Environment, energy and recycling	350
13.1.4. Safety and disaster prevention/preparedness	351
13.1.5. Transportation systems for affluent and fulfilling future society.....	352
13.2. Forecast topic framework	353
13.3. Topics with high degree of importance.....	354
13.4. Forecasted realization times.....	356
13.5. Current leading countries etc.	356
13.6. Comparison with the 5th Survey (previous survey).....	357
13.7. Table of survey results.....	359
14. Survey results in “Health, medical care and welfare”	365
14.1. Trends in areas of attention.....	365
14.1.1. Malignant neoplasms	365
14.1.2. Scientific lifestyle guidelines for adult disease (lifestyle disease) prevention.....	366
14.1.3. Advances in science and technology, changes in lifestyles and emerging infections.....	367
14.1.4. Gene diagnosis and therapy	368
14.1.5. Advances in artificial organs	369
14.1.6. Direction of welfare and nursing care.....	370
14.1.7. Conclusions	371
14.2. Forecast topic framework.....	372
14.3. Topics with high degree of importance.....	373
14.4. Forecasted realization times.....	374
14.5. Current leading countries etc.	374
14.6. Comparison with the 5th Survey (previous survey).....	375
14.7. Table of survey results.....	377

Reference 1	Members of technological forecast committee and sub committee	387
Reference 2	Authoring task allocation.....	394
Reference 3	Top 100 topics in the fifth survey	395
Reference 4	Technology forecasts illustrated	402

Translation from Japanese Version

Notes on English translation of the original Japanese version

(1) Chapter1 and Chapter2 were fully translated.

(2) Chapter3 was translated partially by applying the following approach to each field

- “Trends in note worthy domains”: translated fully
- “Topics with high degree of importance”: Survey results summaries focused on domains and objectives as shown in the framework omitted
- “Forecasted realization times” and ”Current leading countries etc.”: Survey results summaries focused on domains and objectives as shown in the framework and typical examples of topics omitted
- Other questionnaire reply analysis results omitted
- “Examples of respondents’ comments on each of topic” and “Chronological table of future technologies” omitted completely

(3) The list of topics proposed by respondents for high future advancement prospects was omitted from the “Reference”.
